COASTAL ENGINEERING

# Contents Volume 32, 1997

*Research Papers*

Wave transformation for beach nourishment projects
P.A. Work and W.E. Rogers . . . . . 1

The influence of clay on the threshold of movement of fine sandy beds
I. Panagiotopoulos, G. Voulgaris and M.B. Collins . . . . . 19

Rapid water table fluctuations within the beach face: Implications for swash zone sediment mobility?
I.L. Turner and P. Nielsen . . . . . 45

Sediment transport and budget of the central coastal zone of Holland
L.C. van Rijn . . . . . 61

Time-dependent equations for wave propagation on rapidly varying topography
K.D. Suh, C. Lee and W.S. Park . . . . . 91

Wave parameters in the nearshore: A clarification
L. Hamm and C. Peronnard . . . . . 119

A fully-nonlinear computational method for wave propagation over topography
A.B. Kennedy and J.D. Fenton . . . . . 137

Boussinesq modelling of wave-induced horizontal particle velocities
J. Bosboom, G. Klopman, J.A. Roelvink and J.A. Battjes . . . . . 163

The growth rate of finite depth wind-generated waves
I.R. Young . . . . . 181

Low frequency swash motion induced by wave grouping
T.E. Baldock, P. Holmes and D.P. Horn . . . . . 197

The use of a discrete Vortex model for shallow water flow around islands and coastal structures
E.A. Hansen and L. Arneborg . . . . . 223

*Technical Note*

Height limits in top down and bottom up wave environments
R. Nelson . . . . . 247

*Research Papers*

Surf zone dynamics simulated by a Boussinesq type model. Part I. Model description and cross-shore motion of regular waves
P.A. Madsen, O.R. Sørensen and H.A. Schäffer . . . . . 255

Surf zone dynamics simulated by a Boussinesq type model. Part II: surf beat and swash oscillations for wave groups and irregular waves
P.A. Madsen, O.R. Sørensen and H.A. Schäffer . . . . . 289

Acoustic measurements of the velocity field beneath shoaling and breaking waves
J.C. Doering and M.A. Donelan . . . . . 321

*Contents Vol. 32* . . . . . 331

*Keyword Index* . . . . . 333
